MuhammadShakil Patel

Software Engineer | ICT Student

Surat, Gujarat, India

Summary

As an accomplished software developer with a robust background in both mobile and web application development, I bring a wealth of experience across multiple programming languages and frameworks.

My expertise spans Kotlin, PHP, JavaScript, Java, Python, C++, C, Dart, and C#, coupled with a deep understanding of frameworks like Android Jetpack Compose, React.js, React Native, Laravel, .NET, and Flutter. I am currently pursuing an MSc in ICT at JP Dawar College in Surat, affiliated with VNSGU, which further enhances my theoretical knowledge and practical skills.

I have successfully developed and deployed a fully functional Barcode Inventory Management System (BIMS) and am in the process of converting it into a scalable SaaS product. This involves implementing complex features such as multi-tenancy support, custom fields, product attributes, and comprehensive audit logging.My proficiency in backend development is highlighted by my work with Laravel, where I have created intricate migrations and models, and in Node.js with MongoDB for building REST APIs. I am also skilled in modern front-end technologies, exemplified by my projects using React.js and Tailwind CSS.

Currently, I am working on a cutting-edge research project on prompt engineering, aimed at creating a machine learning model that generates personalized prompts to enhance the accuracy of responses from the OpenAI API. This innovative approach leverages user data to continuously refine and improve the system.Another notable project is 'MindsMeet,' a Learning Management Student Collaboration System developed in full-stack Java with MySQL. This system features modules such as category/subject-wise notes, community groups, feeds, FAQs, and optional chat functionality using web sockets.

I am adept at managing full-stack development projects, evidenced by my work on various Android and web applications. My ability to design and implement efficient, scalable solutions makes me a valuable asset in any development team. For a comprehensive view of my work, please visit my GitHub or explore my web app at Tech Savvy Solution.

Experience

The WBVF
Flutter & Laravel Developer
September 2024 - Present (8 months)
Bharuch, Gujarat, India

Developing full fledged NGO management application with highly scalable and secure backend.

Tech Savvy Solution
Founder and CEO
May 2024 - Present (1 year)
Anklesvar, Gujarat, India

Gi1
Chief Technology Officer
June 2022 - Present (2 years 11 months)
Vadodara, Gujarat, India

myCampus
Android Developer
February 2023 - April 2024 (1 year 3 months)

Education

Veer Narmad South Gujarat University, Surat
Master of Science - MS, Information & Communication Technology · (June 2024 - May 2026)

Veer Narmad South Gujarat University, Surat
Bca, Computer Science · (October 2021 - May 2024)
